medical packaging

PERFECT MATCH

No matter what you need to pack, present professionally or transport safely – we've got the right packaging. Our large product range includes cases in numerous sizes and designs.

PROTECTIVE PACKAGING PIONEERS

rose plastic medical packaging is a company of the rose plastic group. Together we are renowned throughout the world as a pioneer in protective tool packaging. Besides medical technology, many other industries appreciate our uncompromising quality, precision and reliability. Numerous industry firsts and over 65 years of experience have made us the world's best-selling packaging brand for cutting tools.

Our plastic cases

From the pioneers of protective packaging

Reliable product protection, easy handling, uncompromising quality and durability – this is the standard for all our cases here at rose plastic medical packaging. The name rose plastic medical packaging stands for decades of expertise in the development and production of a wide range of plastic packaging options.

With a portfolio of over 4,000 different plastic packaging solutions and cases, we are the worldwide leaders in our field. Throughout our extensive range of packaging tubes, cassettes, boxes, cases and clever transportation and organization systems, we ensure optimum protection against damage, moisture and dust.

The RoseCase ErgoLine

Our trendsetter

Want to stand out from the competition? Not a problem with RoseCase ErgoLine. With its modern design ensuring maximum recognition value. Loaded with practicality, while at the same time, offering numerous universal applications. We can tailor the case to your specific requirements using color, corporate design or thermoformed and foam inserts. From now on, you won't have to do without any of your cherished measuring and diagnostic equipment or product samples.

EASY TO HOLD

The ergonomic handle is also available with „Soft-Touch“

COLORFUL

Choose the color of the closures to match your corporate design

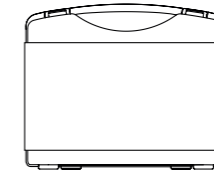

ATTRACTIVE

Designed with smooth outer shells allowing printing, engraving or labelling

The **RoseCaseProTec**

Our technician

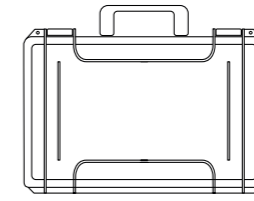

Sensitive medical devices require secure packaging solutions. Cases, in particular, have to resist a lot. Our designers have also thought about this when developing an exclusive case with technical design – strong and sturdy at the same time. Bespoke foam inserts are available to hold your implants, instruments, samples and electronic devices securely. Using a foam insert really does give the best appearance for your products when delivering to your customer or enhancing the presentation for your sales team!

Security experts.

The **RoseCase ProSecure**

Our high security area

In an emergency, every second counts, every move must fit. Despite time pressure, the life-saving equipment must not be damaged. And it has to survive a lot. Securely protecting the equipment in all environments is key. RoseCase ProSecure loves a challenge! Professional protection, in extreme situations, is provided by the robust case shells and IP67 seals in the lid. As well as an automatic pressure release valve and double throw latches for easy opening in tough conditions.

Safe.
Waterproof.
Shockproof.
Dustproof.

ULTIMATE SEAL

IP67 certification preventing dust and water ingress

MAXIMUM SECURITY

Padlock eyelets for added security

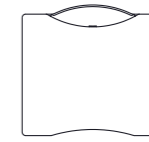

PROTECTIVE PATTERN

Configure and customize foam inserts

The RoseCase RCS

Our space miracle

RoseCase RCS is our selection to cover products that need something a little bit different. It makes prime use of its size – a space miracle. In addition, the foldable handle saves space during storage and transport. A foam insert can be added to maximize on protection and presentation without compromising on space. Available in two different sizes, it offers a light but very stable cover for a wide range of small items and assortments. If you need something for a special product speak to us!

SPACE EFFICIENT

The foldable handle helps to utilize storage space

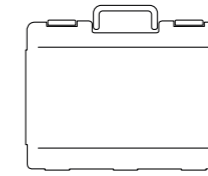

CATCHING IMPRINT

There is enough space for colored imprints on the case lid

WELL THOUGHT OUT

Practical, handy, light and yet stable

The RoseCassette

Our eye-catcher

Bringing organization to smaller parts, this highly transparent plastic lid offers the best view on inner values. As an organization box, it is ideal for storing and transporting emergency kits, screw sets and other small component parts. With matching thermoformed inserts as well as various color combinations, printing and labelling options, the cassette can be individually designed. What more do you need?

Universal,
light and
stable

CLEAR AS GLASS

The highly transparent lid provides the perfect view

PERFECT FIT

With deep-drawing inserts the cassette can be adapted to your needs

PRECISE ORGANIZATION

Everything stays in its place, even small parts

Our foam solutions

Where ideas become reality in foam

So the decision has been made, you have chosen your perfect packaging solution. Now for the icing on the cake, the foam insert... For that added protection we are able to offer a comprehensive range of protective foam inserts. From the inexpensive standard stock versions to the custom made bespoke solution, created with millimeter precision and finesse. Available in a choice of PE rigid & PUR grades of materials and colors. If that is not enough, we are happy to fulfill any special requests.

Practical,
secure and
efficient

EVERYTHING IS CONSIDERED

We offer solutions for almost all our products, with many available from stock

MULTIPLE SHAPES

Foams are available in all conceivable shapes, including round

Foam inserts that fit like a tailor-made suit

Custom foam work that you can afford!

IN 7 EASY STEPS TO YOUR FOAM SOLUTION:

1. Enquire
2. Quote
3. Measure
4. Design
5. Approve
6. Manufacture
7. Deliver

Material

DOUBLE PROTECTION

Double is known to be better. That's exactly how we see it: foam inserts ensure that your products sit securely in our packaging and offer the maximum protection to sensitive content. They are particularly suitable for the protection of complex monitoring equipment and component protection within Aerospace, Offshore, Defense, and Energy renewables, Audio / Visual, Medical & Marketing sectors that require products to be transported together in one secure case.

PE FOAMS

Polyethylene (PE) foam is an extraordinarily versatile, fully extruded, durable material that gives a unique combination of excellent physical and chemical properties with a smart appearance. The light-weight closed-cell construction offers superior cushioning against repeated impacts and can be engineered with anticipated performance. It provides easy fabrication, cost-effectiveness and suitability for a wide range of applications. PE foams are commonly used for standard packaging, cushioning, blocking and bracing, or surface protection.

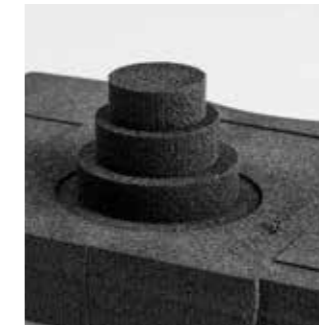

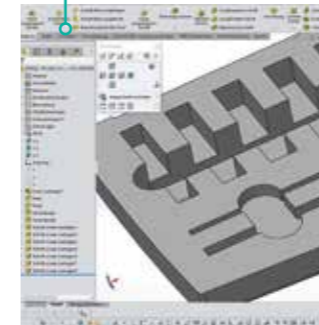

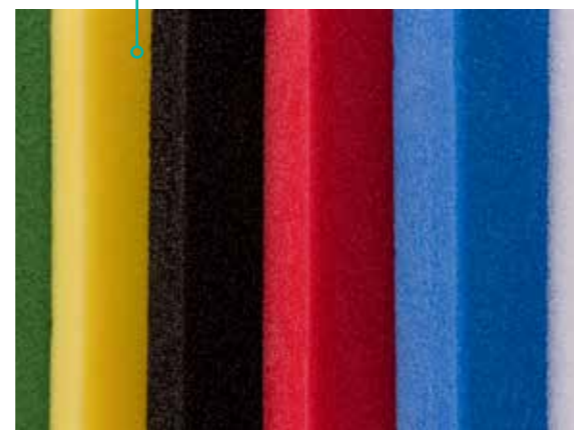

PUR FOAMS

In contrast to PE foams, Polyurethane (PUR) foam is a light, inexpensive and durable foam with many applications. Convoluted (egg crate) foam, gasketing, filters, sponges and sound dampening (acoustical foam) are all examples of Polyurethane foam. Polyurethane foams are clean, non-abrasive, extra strong, and durable and perfect for general comfort cushioning, display and packaging of products.

Colors

PERFECT APPEARANCE

As we all know 'First impressions count'. In order to leave a positive lasting impression, you should think about the color of your foam. To help you do this, we have a large selection of choice from a comprehensive color palette to compliment your corporate design.

Production

CAD/CAM DESIGN

A dedicated design team with decades of experience – a winning combination. We can support you proficiently and personally in the development and implementation of your required foam solution. For this we use the latest range of advanced AUTOCAD and CNC software packages, so you can rely on our service from the first contact to the conception and implementation of your project.

MANUFACTURING

CNC multi-head/axis machining, die-stamp & water jet cutting: Complex shapes, varying depths, recessed grips, and assorted sizes – no problem. Using the latest technology, allows us to offer a truly professional and custom solution to suit your specifications with millimeter precision.

LASER MARKING

Save the best while last: By using the latest in laser branding techniques, we are able to make sure your projects remain 'on brand' at all times. Precise lasers allow for both intricate fonts along with complex logo designs giving your product the winning factor.

GET IN TOUCH

If you have a specific idea or design in mind, we are on hand to answer any queries you may have. Alternatively, if you are ready to start the process, get in touch with us for a free consultation.

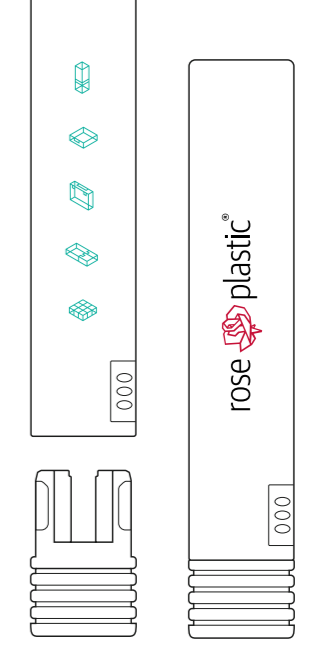

We print also on Bio-PE

Our printing and finishing service

Because last impressions count

So it's time to stand out from the crowd. Let us help you to impress your clients. Packaging is a key part of your product and therefore an integral component of your brand. A smart imprint significantly enhances. In other words: Effective branding begins with the packaging rather than the product. Our in-house print shop enables us to print your packaging immediately after production, avoiding costly detours or if you prefer we have the facility of providing full color label options.

- POSSIBLE HINTS FOR YOUR LASTING IMPRESSION:**
- Company logo or product brands
 - Slogans or other short texts
 - Product information
 - Company information
 - Drawings, illustrations, symbols
 - Picture motives
